Pfungstadt, Germany, February 29<sup>th</sup>, 2016

## Guidance Document for detailing the Heavy Duty Emission Legislation for the Introduction of DPF in IRAN from the Stakeholder Process.

- Based on intense technical discussions and discussed solutions
- Focused on UFP Ultra-Fine Particle Emission Control by newest methods
- Took hardships away from the industry, by allowing OEM or Option Fit DPF solutions
- Tailored to Iran Fuel quality & plans
- Considering Iran altitude conditions for emission measurements and engine application
- Does not invent something new, but takes known European emission certification practices
- Promotes research and development -> leads into the future
- Translates High Level decisions into technical directives that are understood by engineers
- Clarification for Option Fit

## Certification of Light Duty Commercial Diesel Vehicles: Van – Pickup N1, N2

- Certification on Chassis Dyno in NEDC with PN measurement and Limits
- Based on EURO IV + DPF; alternate EURO 5b Approval accepted
- Agreement reached in Stakeholder Meeting: agreement with Isuzu and even Daimler VAN
- Guidance document can be published immediately

## 2016 Recent Change in German Emission- Whole vehicle Type Approval Authority

- Did not have any emission measuring & test equipment
- **Buerocratic approach** with quality focus on paperwork correctness

Changed to

- Takes an engineering approach to **challenge the manufacturer about the real emission performance of the vehicles**
- Authority ordered PEMS systems for „Real driving Emissions“ RDE test and also an emission chassis dyno
- Contracts TÜV to perform tests according to directives and new: also special focused emission tests, before issuing new approvals

## Recommendations and Summary

- In the stakeholder process we have seen solutions from all manufacturers to comply with the new Iran emission legislation – given some would have to be developed
- The Emission cabinet of ministries decision plus the stakeholder process plus lots of F2F meetings was international state of the art process for emission legislation.
- Bypassing or ignoring this process should not be rewarded with any concession
- Emission legislation needs focus to improve **Air quality AND Economic Growth** -> moves to more complex deals
- Publish the certification new legislation guidance paper
- Strengthen the technical expertise in Type Approval TA backed by Iran National “Know How” Emission laboratory
- Increase resources in emission type approval and focus more towards Real World Emissions
- Accompany New DPF Legislation with PTI Periodical Technical Emission Inspection new measures: namely “CITY VEHICLES”

## Imagine.....

- Please imagine the chances and attractiveness of Tehran and of course IRAN with clean air...
- How much this is worth and how this would promote economic growth, employment, quality of life...

## ***Soot-free Tehran***

International workshop on solutions for eliminating Diesel and gasoline emitted soot from urban air

September 7th, 2016 Sharif University, Tehran, Iran

**Discussions are welcome**

## 150 YEARS | INSPIRING TRUST

### Inspiring trust since 1866

The year 2016 marks the 150th anniversary of TÜV SÜD. Since 1866, the company has been partnering businesses and inspiring people to trust in new technologies.

Today, TÜV SÜD has grown into an international service company with global representation in over 800 locations, and with over 50 per cent of its employees working outside Germany.

In the decades to come, it will continue to make the world a safer place as a future-oriented company shaping the “next practice” in safety, quality and sustainability.

# Financial results of strategic business segments 2015

## MOBILITY

- **Employees:** 5,539
- **Sales Revenue:** € 638.8 million
  - **Auto Service:** 100.0 %

## INDUSTRY

- **Employees:** 8,164
- **Sales Revenue:** € 945.4 million
  - **Industry Service:** 63.6 %
  - **Real Estate Service & Infrastructure:** 36.4%

## CERTIFICATION

- **Employees:** 6,061
- **Sales Revenue:** € 556.7 million
  - **Product Service:** 74.8 %
  - **Management Service:** 25.2 %

# Driving a century of safety on the roads

## Automotive R&D and manufacturing

### Services for automotive suppliers and Original Equipment Manufacturers (OEM) include:

- Component and full vehicle testing (including emissions)
- Homologation, certification and international regulatory compliance management
- Quality & safety services (including functional safety)

## Transportation

### Services for repair shops and car dealerships, leasing companies and fleet management companies include:

- Vehicle and used car management
- Damage assessments
- Value appraisals
- Quality and process optimization
- Performance audits
- System certification
- Training

## Road safety & traffic

### Services for government transport authorities include:

- Legal framework advisory
- Development of periodic transport inspection solutions
- Transport research and advisory
- Driving Licence

### Services for private vehicle owners include:

- Periodic technical inspections
- Used vehicle assessment & valuations
- Expert reports and damage assessments
- Issue of emission stickers

## Focus on commercial vehicle industry

## Transportation and commercial vehicle have special requirements – we have experts & solutions

- More than **300 experts**
- We provide customized, modular and pragmatic solutions via the following Segments
  - Homologation / type approvals
  - Periodical Testing Inspection
  - Value Appraisals
  - Damage Assesments<sup>1)</sup>
  - Load Securing

<sup>1)</sup> e.g. standardized, multilingual buy back appraisals in > 20 countries for MAN

## TÜV SÜD Auto Service Statistics (2015):

- Holdings: Subsidiary of TÜV SÜD Auto Service and Auto Partner offices
- Turnover: **€ 679** million
- **4,700** qualified employees
- **100** qualified Auto Partner offices (Franchise)
- **406** service-centers
- **16.000** partner-garages (PTI)
- **5,9 million** vehicle inspections per year (germany wide)
- **485,000** driving tests per year

## Range of Services:

- Periodical technical inspections
- Periodical emissions tests
- Driving licence

## Clients:

- Private clients
- Commercial clients

The image shows the TÜV SÜD ATISAE Spain logo in the top left corner, featuring the TÜV SÜD octagon and the text 'ATISAE Spain'. Below the logo is a map of Spain with its regional boundaries outlined in white. To the left of the map is a waving flag of Spain, consisting of three horizontal stripes of red, yellow, and red.

## ATISAE Statistics:

- 100% TÜV SÜD
- 34 PTI Stations
- 990.000 vehicle inspections per year

## Range of Services:

- Vehicle inspections and service
- Sales and service tests
- Automotive Consulting

## Clients:

- Private clients
- Commercial clients

## TÜV TURK Statistics (2014):

- Subsidiary of TÜV SÜD Auto Service and others
- Turnover: € 350 million
- 3,500 qualified employees
- 203 test centers
- 100 mobile test centers
- > 10 million vehicle inspections per year

## Range of Services:

- Periodical technical inspections
- Periodical emissions tests

## Clients:

- Private clients
- Commercial clients

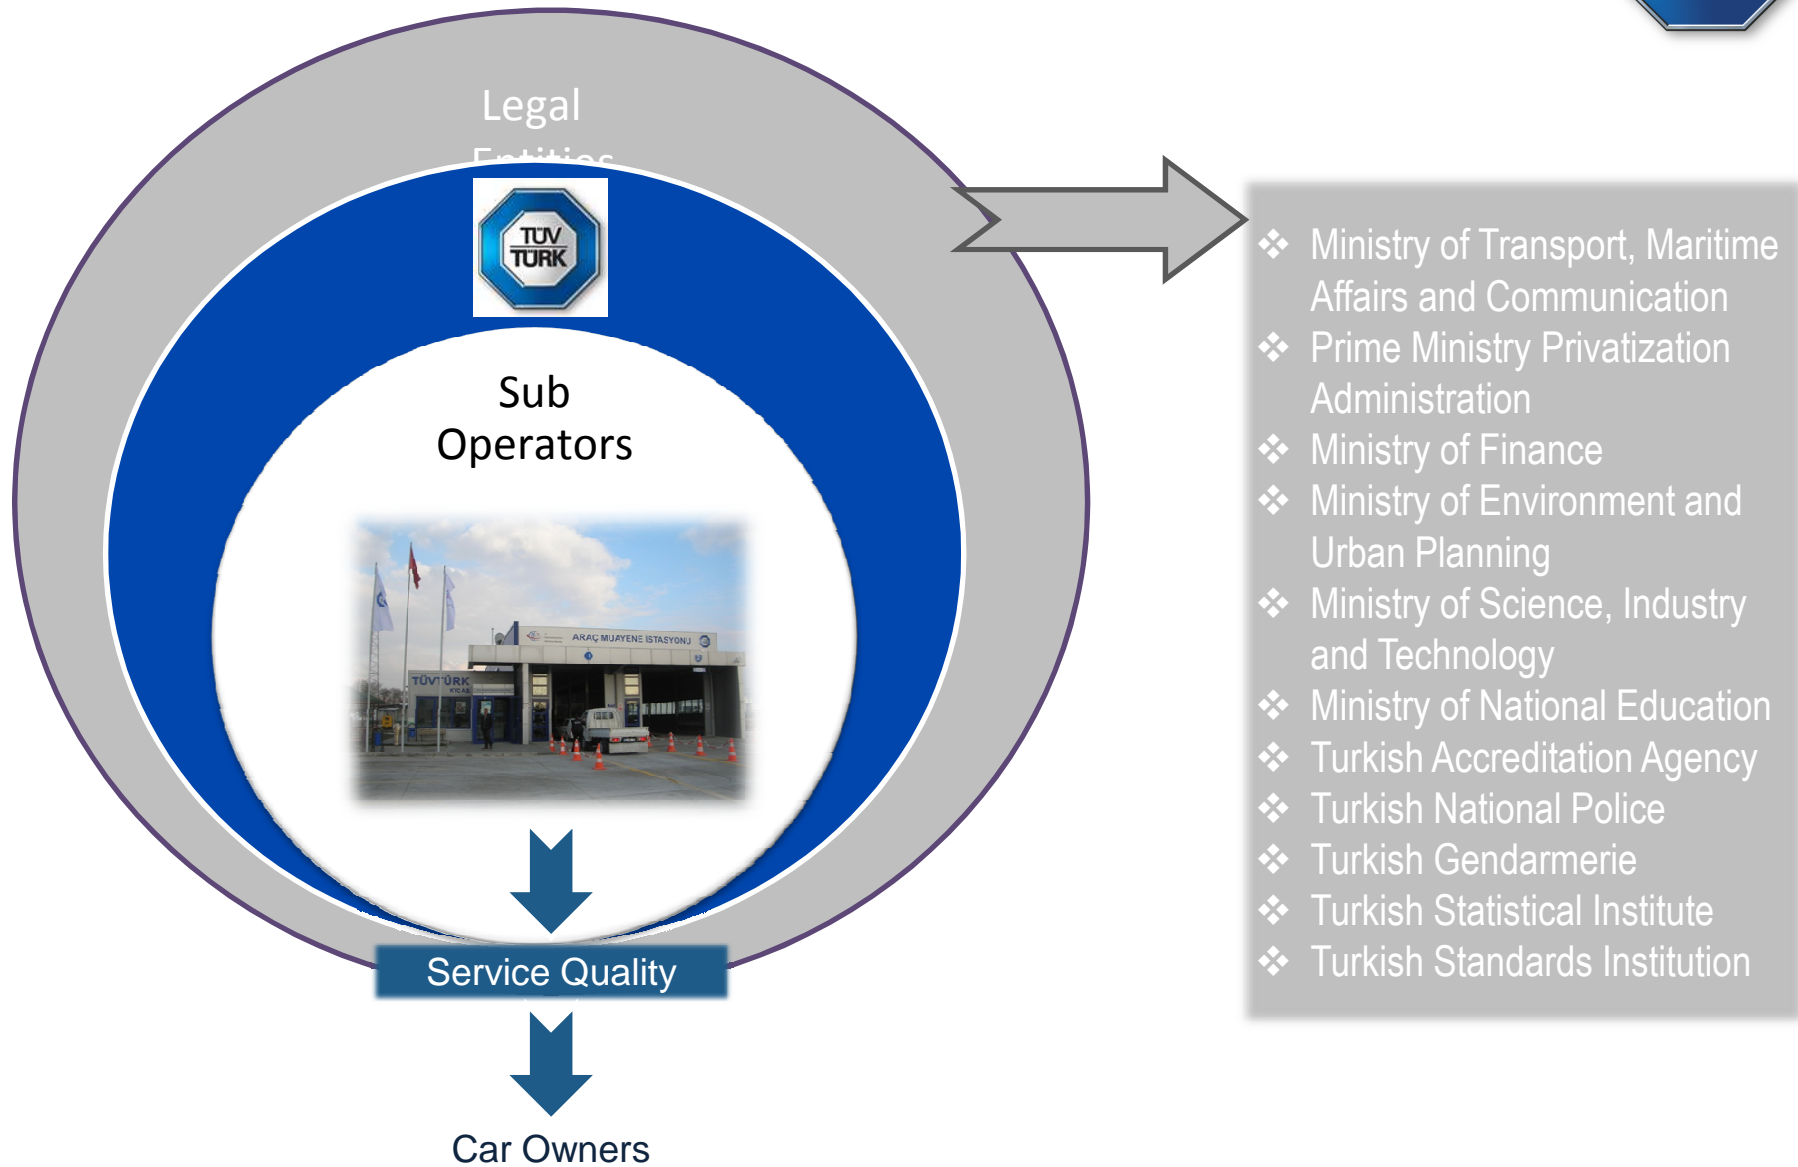

# Road safety & traffic; Turkey – facts & figures

<b>Target:</b>	Vehicle Inspection Network allover Turkey
<b>Size:</b>	189 Stations, 81 Mobile Units
<b>Test Standard:</b>	96/96 EG
<b>Realisation Time:</b>	18 months
<b>Company:</b>	TÜVTURK
<b>Shareholders:</b>	TÜV SÜD, Doğuş, Akfen (shares sold to Bridgepoint in 2009)
<b>Employees:</b>	2.200
<b>Operation Period:</b>	20 Years
<b>Operation Condition:</b>	Monopoly
<b>Investment:</b>	630 Mio. Euro

## Knowledge Transfer

- Train the Trainer in Germany
- Continous Monitoring of the training through TÜV SÜD-Experts
- Creating of a new kind of training
- Qualitymanagement
- Stationdesign
- Station (test) equipment

## Project Management

- Control of the installation of 189 stations in 18 months with a international, professional team with employees of all 3 partner
- Steering of approx. 70 station constructions simultaneously
- Installation of Equipments just in time
- Projectplan day specific for each station
- Continous checks on the construction sites
- Continous meetings with project members – intensive communication
- Fast decisions

## IT

- Usage of the existing Inspection Software of TÜV SÜD
- Software Transfer from TÜV SÜD to TÜVTÜRK
- Online Reservation System
- Queue System
- Electronic Archive System
